# STELLINI

## TEXTILE GROUP

In recent years the trend has been for mattress manufacturers to buy the right product at the cheapest price – for this reason many companies have switched production from their own country to various parts all around the world. This policy could have some benefits but also have some disadvantages.

We too could source all materials from around the world. But it's not for us. We prefer to build our own plants. Using our extensive know-how, we are able to produce the best product at the most competitive price.

We do not intend to close our plants in Europe; we have invested more during the last 10 years than in the first 40 years of our existence.

We truly believe that only keeping improving the synergies between us and the other plants around the world we can guarantee to our customers that we will continue to produce the most innovative products give the best service whilst keeping prices competitive.

**Did we succeed? Come and find it out!**

**MATRESS TICKING FABRIC – DOUBLE JERSEY KNIT  
POLYPROPYLENE YARN**

Nowadays we talk more and more about the importance of nature and the environment. We feel a strong desire to surround ourselves with natural products and live in harmony with The World around us.

In response Stellini have created a complete collection of fabrics with natural yarns provided by Mother Nature.

**Bamboo** - bamboo fibre

**Kapok** - natural hollow fibre

**Soya** - soy bean fibre

**Silk** - silk fibre

**Linen** - linen fibre

**Organic Cotton**

**Cachemire** - wool fibre

**Fresco Canapa** - hemp fibre

**Cupro** - cellulose fibre

**Milkofil** - milk protein fibre

**Lenpur™** - pine tree fibre

**Tencel®** - cellulose fibre

Like an Italian chef we have hand-picked the most innovative products from the "hi-tech yarn market" and carefully combined each ingredient to ensure we get the best performance from each fabric ...thermo-regulating properties, moisture control, anti-static and bacteria control... providing the real answer for all your marketing challenges!

**Aerlan®** - natural look PP

**Cocona™** - anti-odour

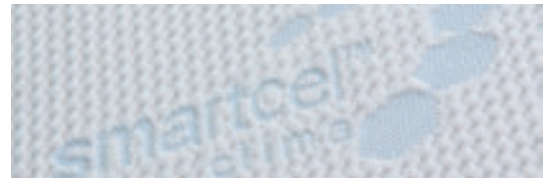

**CoolFeel** - moisture management

**Smartcell™ Clima** - PCM

**Sleep and Dream** - anti-stress

**X-Static®** - silver yarn

**Elastar®** - elastic jacquard

Sometimes the story behind our natural or techno life fabrics is not enough and we need to reassure customers that our products really can perform. Antibacterial, antifungal, anti dust-mite, anti stain, washability, flame retardant, softness and comfort are not just stories – in fact our complete line of functional products is backed up with certification to give you the peace of mind needed to really market a value added product accurately.

**Hydrofriend** - moisture management

**Argentum** - nano silver

**PowerStar** - coating

**Starplus** - barrier coating

**Stealth** - non see through coating

**Antislip** - no slip

**PurStar** - foam coating

**Aloe Vera** - wellness

**Sanitized®** - antibacterial, anti dust mite

**MembranStar** - breathable membrane

**Bionic-Finish®** - water repellent

**Stabil, StabilFR** - coating

The Stellini Textile Group has dedicated time and energies to research and develop a range of new characteristics that have made polypropylene suitable to uses hitherto unthinkable. We worked to improve its aspect, trying to make it look like natural fibres, but above all to make it an “active” fibre. Thanks to a proprietary technology called Built-In we have managed to include active principles and chemical substances, activating an otherwise inert fibre.

These principles have been inserted into fibres with various sections, such as:

*Trilobe/Delta: market standard, with 72 filaments.*

*Round: also common, available with 25, 72 and 144 filaments.*

*Hollow: more difficult to find outside Europe, compared to other sections, it boasts 20-25% greater volume at equal weight, it is available with 60 filaments.*

Those filaments can be produced in FDY parallel airtangled, Taslan or BCF. Among the various functional fibres realized with the Built-In technology there are the following:

**Antibacterial**

**Anti dust mite**

**Anti Fire**

**Luminescent/Glow in the dark**

**Anti Algae**

**Outdoor**

**Anti-Odour**
